

# ABHILASH WAGHMARE

## DevOps Engineer

abhilash.waghmare@outlook.com | +91-9876543210 | LinkedIn: linkedin.com/in/abhilash-waghmare | GitHub: github.com/abhilash-waghmare | Pune, India

### PROFESSIONAL SUMMARY

Motivated DevOps Engineer with hands-on experience in CI/CD pipeline design, containerization using Docker, Kubernetes orchestration, and cloud infrastructure across AWS, GCP, and Azure through academic projects and internship. Proficient in Terraform for Infrastructure as Code, Git-based version control workflows, and Linux server administration. Experienced in monitoring and observability using Prometheus, Grafana, Datadog, and CloudWatch. Eager to contribute to high-performing DevOps teams focused on automation, scalability, and continuous delivery.

### INTERNSHIP EXPERIENCE

#### DevOps Engineer Intern | Hisan Labs Private Limited, Pune

Jan 2024 – Jun 2024 (6 Months)

*Cloud & DevOps Division*

- Designed and implemented a Jenkins-based CI/CD pipeline that reduced manual deployment effort by 60% through automated build, test, and deploy stages
- Configured GitHub webhooks to trigger automated build and deployment workflows on every code commit, ensuring rapid feedback loops for the development team
- Collaborated with development teams to integrate SonarQube for static code analysis into the CI pipeline, improving code quality across all services
- Containerized 3-tier web applications using Docker, writing custom Dockerfiles and Docker Compose configurations to ensure consistent environments across development, staging, and production
- Built and pushed Docker images to Docker Hub as part of the CI pipeline; managed image versioning and tagging conventions across multiple services
- Configured Docker networking and persistent volumes to enable seamless communication between application containers and database services
- Deployed and managed containerized microservices on Kubernetes cluster using Deployments, Services, and ConfigMaps; maintained 99.5% uptime across all environments
- Configured Kubernetes Horizontal Pod Autoscaler (HPA) to handle traffic fluctuations and implemented rolling update strategies for zero-downtime releases
- Automated provisioning of AWS EC2 instances, VPCs, and security groups using Terraform scripts, reducing infrastructure setup time by 40% and eliminating manual configuration errors
- Managed Terraform state files remotely using S3 backend with state locking via DynamoDB, ensuring safe concurrent infrastructure operations
- Monitored application health and infrastructure metrics using Prometheus and Grafana dashboards; configured alerts via CloudWatch for EC2 and RDS services
- Administered Linux (Ubuntu) servers including user management, cron job scheduling, log rotation, and firewall configuration using UFW

### TECHNICAL SKILLS

**Cloud Platforms:** Amazon Web Services (AWS) – EC2, S3, VPC, IAM, EKS | Google Cloud Platform (GCP) | Microsoft Azure

**CI/CD Tools:** Jenkins, GitHub Actions, GitLab CI

**Containerization:** Docker, Docker Compose, Docker Hub

**Orchestration:** Kubernetes (K8s), Helm, kubectl

**Infrastructure as Code:** Terraform, AWS CloudFormation

**Version Control:** Git, GitHub, GitLab, Bitbucket

**Monitoring & Logging:** Prometheus, Grafana, Datadog, AWS CloudWatch, ELK Stack (Elasticsearch, Logstash, Kibana)

**Scripting Languages:** Bash, Shell Scripting, Python

**Operating Systems:** Linux (Ubuntu, CentOS, Amazon Linux), Windows Server

**Databases:** MySQL, PostgreSQL, MongoDB

**Build Tools:** Maven, Gradle, npm

**Code Quality:** SonarQube, OWASP ZAP, Trivy  
**Artifact Registry:** Docker Hub, Nexus Repository, AWS ECR  
**Secrets Management:** HashiCorp Vault, AWS Secrets Manager  
**Collaboration Tools:** Jira, Confluence, Slack, MS Teams

## DEVOPS PROJECTS

---

### Project 1: Flight Reservation Microservices Application

*Technologies: Docker | Kubernetes | GitHub | Microservices Architecture*

- ▶ Containerized 5+ independent microservices (booking, auth, payment, notification, API gateway) using Docker with custom Dockerfiles and multi-stage builds, reducing image size by 60%
- ▶ Deployed entire microservices suite on a Kubernetes cluster using Deployments, Services, and ConfigMaps; implemented rolling update strategy for zero-downtime releases
- ▶ Configured Kubernetes ClusterIP and LoadBalancer services along with NetworkPolicies for secure inter-service communication and external traffic routing
- ▶ Implemented Horizontal Pod Autoscaler (HPA) with custom CPU and memory thresholds, enabling the platform to handle 5x peak traffic automatically
- ▶ Managed source control and team collaboration through GitHub, enforcing GitFlow branching strategy throughout the project lifecycle

### Project 2: EASY CRUD – 3-Tier Application Deployment

*Technologies: Docker | Linux | Git | MySQL | Docker Compose*

- ▶ Architected and deployed a production-grade 3-tier application (React frontend, Node.js backend, MySQL database) using Docker Compose with isolated bridge networks for each tier
- ▶ Containerized all three application layers with Docker; configured persistent volumes for the MySQL container ensuring data durability across container restarts
- ▶ Integrated backend RESTful APIs with MySQL using environment-variable-based connection management, eliminating hardcoded credentials from all application code
- ▶ Managed full project lifecycle using Git and GitHub, including feature branching, pull requests, and semantic version tagging for each production release
- ▶ Deployed and maintained the application on a Linux (Ubuntu 22.04) server, configuring system firewall rules and environment variable management for each environment

## CERTIFICATIONS

---

- ▶ AWS Certified Cloud Practitioner (CLF-C02) – Amazon Web Services, 2024
- ▶ HashiCorp Certified Terraform Associate (002) – HashiCorp, 2024
- ▶ Certified Kubernetes Administrator (CKA) – Cloud Native Computing Foundation, 2024
- ▶ Docker Essentials: A Developer Introduction – IBM / Coursera, 2023
- ▶ Jenkins: Beginner to Pro CI/CD Pipeline – Udemy, 2023

## EDUCATION

---

### Bachelor of Technology – Computer Science & Engineering

Savitribai Phule Pune University, Pune

Graduated: 2024 | CGPA: 8.4/10

## LANGUAGES

---

English (Professional Working Proficiency) | Hindi (Native) | Marathi (Native)
